City of Brno | Congress Tourism

# Introduction |

Thanks to its strategic position, the City of Brno ranks among the most important cities of Central Europe. This is documented by top-level negotiations, for instance of European Union Member State representatives; meetings of the Visegrad Four are held regularly in the metropolis on the Svratka river. Furthermore, the city has one of the most notable exhibition areas in Europe where prominent personalities of economic life of the whole world meet. Brno thus became one of the most popular congress destinations in the Czech Republic.

It contains suitable areas for such meetings; many hotels are equipped with congress halls with all the necessary technical equipment for business and political meetings and negotiations. Holiday Inn and the complex of buildings of the Voroněž Hotel, adjacent to the area of the Brno Exhibition Centre, are among these; hotels in the City centre have similar background. Separate meetings can be held in the luxurious facilities at the Brno lake or amongst the beautiful woodland countryside at the Masaryk Circuit.

Every company may choose exactly what it needs from the wide offer. This is supported by transport availability and easy airplane connection both through regular and private flights from the whole Europe.

## | Introduction

Brno is the second largest city of the Czech Republic; it is located in the central part of Europe and it has almost 400,000 inhabitants. It has a rich history and there is a wealth of sights in the City and its surroundings.

Moreover, after the termination of work meetings, sufficient relaxation is necessary; and the region is well suited for relaxation, offering a wide range of opportunities for social activities and tourism. In Brno, there is a whole range of theatres, museums, galleries, concert halls and music clubs, where cultural, sports and other types of events are held regularly. The "Pálava" Protected Landscape Area is located south of Brno and offers wine cellars of good style; the Moravian Karst protected area is located north of Brno. The famous Žuráň hill with the Austerlitz battlefield, where the famous battle of three emperors took place under the command of Napoleon Bonaparte, is located only five kilometres from Brno. Golf lovers can enjoy the golf course not far from this place.

# Historical Sights |

There are twenty important historical sights located in the centre of Brno. Starting from the very centre, the visitor to the central Freedom Square may see important city houses, where Moravian Margraves and aristocracy of that time lived. A baroque plague monument of 1679 with the statues of saints is the dominant feature of the Square. Brno's oldest secular building – the Old Town Hall – is situated only two hundred metres from the Square and it is distinguished by a variety of architectonic styles. It used to be the seat of municipal administration from the beginning of the 14th century until 1935. It is located next to Zelný trh (Fruit and vegetable market) where you may admire the Parnas baroque fountain, built in 1695 by Jan Demard Fischer of Erlach, a Vienna-based architect.

If you turn to any direction from the fountain, you will see other historical sights. For instance, Reduta – the oldest theatre building in Central Europe, which was used for social events and theatre performances as early as in 1767. At that time it hosted the first Czech performance and, furthermore, eleven-

-year-old W. A. Mozart had a concert performance there. A baroque crypt under the Franciscan monk's monastery is very popular among tourists. A unique system of air circulation has enabled to preserve mummies of the Franciscan order members, their patrons and other important persons who were buried there starting from the second half of the 17<sup>th</sup> century. A nearby church dominant – the Cathedral of St. Peter and Paul on the Petrov hillock – can be seen from Zelný trh. You can walk from the Cathedral to the upper terraces of Franciscan gardens and the Denis park. The second Brno dominant is formed by a well-known historic Špilberk castle which became the most famous prison in the whole Habsburg monarchy in the past – the prison of the nations. At present, the Museum of the City of Brno is located there, presenting permanent expositions dedicated to the history of the castle and the City. The hillock offers an unforgettable view of the City and its surroundings.

Tugendhat villa designed by architect Ludwig Mies van der Rohe is a gem of Brno Modern Movement and a crucial piece of world functionalistic architecture. It was built between 1929 and 1930. In 2001 it was recorded in the list of UNESCO world heritage.

## | Surroundings of Brno

The battle of three emperors, the Macocha abyss, the Pálava Hills with wine cellars, and the mushrooming and fishing paradise in the Vysočina co-create the atmosphere of Brno and the South-Moravian Region. A rich offer of free time activities is supplemented by historical masterpieces – castles. The Veveří castle is the closest to the City, towering above the Brno lake. The Pernštejn castle is located in deep mixed forests near the Svratka river and it exhibits a great European heraldry collection. The Lednice-Valtice area, recorded in UNESCO's list of cultural heritage, is one of the best known and most popular. You can find one-hundred-year old beech and oak trees in the park and a large greenhouse; you can take a ride on small boats and visit Jan's castle or the minaret. If you go eastwards from the City, you can visit a baroque castle of a French type with well-preserved interiors in Slavkov. You can learn everything about the historic battle of three emperors at the nearby Mound of the Piece. The landscape is flatter to the south of Brno and this area is well-known for the best grapes in the Czech Republic. It offers great opportunities not only for wine lovers but also game lovers because this region is famous for its best mouflon trophies in the world. Pheasantries in the forester's district of Židlochovice are also quite rare and you can find extraordinary flora and fauna there, including a rare blue frog species.

The well-known Mušov lakes with the largest water area in Moravia are located in the middle of the Pálava Hills, some 40 kilometres south of Brno. These shallow lakes have the warmest temperature for swimming and, moreover, the lakes can also be appreciated by Peter's guild's fans who catch trophy – up to 30 kilogram – carps and great catfish there. The atmosphere of Southern Moravia is enriched by vineyards, cycle paths and wine cellars. In a famous seat in Velké Bílovice there is the biggest amount of wine cellars in the Czech Republic – 150 wine cellars. The Podyjí National Park – one of the four national parks of the Czech Republic – is one of South Moravian jewels. It is situated on an area of 63 km<sup>2</sup> and, together with the Thayatal National Park in bordering Austria, it forms a unique natural area of European importance. Šobes – one of the best Europe's vineyards – is located on its Czech side.

The area of the Moravian Karst, starting on the periphery of Brno, fans out to the north. With more than one thousand caves it ranks among the most important protected karst areas in Central Europe. The Punkva caves with the Macocha Abyss, the Balcarka cave, the Kateřinská cave and the Sloupsko-šošůvské caves are open to the public.

## Exhibition Centre |

Brno Exhibition Centre, a unique exhibition area spread out on 667,000 square meters, will soon celebrate its 80th anniversary. It is suitably located in beautiful nature environment of the Pisárky valley near the Svatka river. Architectonic masterpieces are situated in this area. There are sixteen pavilions and exhibition halls that form a complex giving evidence of the development of fair architecture.

The Exhibition Centre was designed by prominent Czech and Moravian functionalist architects (it was founded in 1928). It is especially the unique A exhibition hall that creates unmistakable atmosphere. A 45-metre high tower of the G exhibition hall is also very interesting as well as the technically perfect dome of the Z exhibition hall and the modern V and F halls.

## | Exhibition Centre

The area also comprises a Congress Centre. The year of 1998 was an important impulse for the development of current fair activities of the joint-stock company Veletrhy Brno and its infrastructure. Veletrhy Brno started strategic cooperation with Messe Düsseldorf, with the City of Brno joining the new business entity later, too.

Fifty important international trade fairs are held at the Exhibition Centre each year. The Engineering Fair is the oldest and still the most important one. Invex, the information technology fair, has become famous throughout Europe in the recent years. The exhibition area is immediately connected to the motorway from Prague and Vienna and it is located near the high-speed railway network.

# Universities |

With its eleven universities (both public and private), Brno is an important university centre of Europe. Masaryk University, the second largest and second oldest university in the Czech Republic, is one of the most famous and it will soon celebrate its 90th anniversary. With 31 thousand students it is among the largest education institutions in the Czech Republic. It has nine faculties, more than 150 departments and it provides education in many different fields. International contacts play an important role and their network extends to all the five continents.

Brno University of Technology has faculties throughout the City and it is the third largest university in the Czech Republic with 15 thousand students. University of Technology provides education not only in strictly technical fields but also in natural sciences and economic and art fields. Many of their graduates work in scientific and technical institutions both in the Czech Republic and abroad.

Mendel University of Agriculture and Forestry in Brno is the oldest university providing education in the field of agriculture and forestry in the Czech lands. It has been educating specialists for 85 years and during this period it has acquired a non-substitutable position among Europe's universities. Among their graduates are almost 23 thousand engineers of agriculture and horticulture, more than 6.5 thousand engineers of forestry and almost 5.5 thousand engineers of economy, working in many different European countries.

The University of Veterinary and Pharmaceutical Sciences is the only university of this kind in the Czech Republic. It has passed demanding European tests and acquired a prestigious award (evaluation) which has only been granted to

one third of veterinary universities in Europe. As a consequence, students and graduates receive many job offers from domestic institutions as well as from abroad; especially from Great Britain and Germany. Many young people from Europe are interested in attending the prestigious studies in Brno.

Military professionals are prepared for their jobs at Brno's University of Defence. The University was established in 2004, merging the University of Land Forces in Vyškov, the Military Academy in Brno and the J. E. Purkyně Military Academy of Medicine in Hradec Králové. This new and only military university in the Czech Republic has profoundly changed and modernized the study plans within the European standard.

Janáček Academy of Music and Performing Arts was created in Brno in 1947. Its creation fulfilled Janáček's lifelong efforts to establish a university developing art abilities and skills of talented people. Traditionally, the Academy organizes prestigious international festivals and encounters, for instance the Setkání/Encounter – festival of Drama and Theatre Universities or the Leoš Janáček Prize competition.

A specific feature of Brno is the possibility to do yachting and other water sports straight in the City. There are many opportunities for these sports on the Brno lake, which can be reached by tram. Those who just want to feast their eyes on the beautiful surrounding countryside around the lake on the Svratka river, may take a ride on one of six excursion boats driven by environment-friendly electric motors. Various social events take place on the boats, too. The lake is also appreciated by fishermen; there is a marvellous trout zone upstream. A zoo is adjacent to the lake; it is located on 65 hectares and it breeds animals of all the continents. The zoo organizes plenty of interesting events for children as well as adults.

Flower lovers may visit the neighbourhood of Tuřany with the largest greenhouses in the Czech Republic, extending on 7.5 hectares of glazed area where an inexhaustible number of different species of European as well as exotic plants are concentrated. It is also interesting to visit the botanical garden and the arboretum; the greenhouses of the arboretum display a collection of more than 2,000 orchids; and there are more than 5,000 taxons of woody species and 2,000 perennials and alpine plants in the adjacent garden.

There are three places in the City centre where those who are interested may play squash; and there are also golf courses in the City and its environs (Slavkov, Jinačovice). If the weather is not good, golf may be played in the H exhibition hall on the premises of Brno Exhibition Centre.

There are many sports centres and fit centres with spinning facilities, and the City may boast itself of several climbing walls.

## | Brno Exhibition Centre and its environs

BVV  Veletrhy Brno, a.s.

Brno Exhibition Centre is a variable complex that can host events intended both for several dozens or several thousands of people. The exhibition grounds provide 15 Conference Rooms that can be arranged into three complexes. These can host congress events for 450 to 840 people. The congresses can also be held in the exhibition halls the total capacity of which, excluding the conference rooms, is nearly 30 thousand people. The congress organisers often take the opportunity of arranging exhibitions accompanying the principal congress events. The Holiday Inn Hotel which is situated directly on the exhibition grounds offers additional space usable as the forth congress complex. The Exhibition Centre is within an easy reach from the D1 motorway exit that leads directly to the exhibition area. The place is also close to the international airport, as well as to the central bus and railway station. It has its own parking house with the capacity of 900 parking spaces. The total capacity including the adjacent car parks is 5,500 parking spaces. Besides offering the spaces for hire the Exhibition Administration Office provides a complete range of other services necessary for the realisation of congresses including organisational backup. For further information go to:
